Evergreens - PROPAGATORS AND GROWERS
WHOLESALE

TELEPHONES: EMPIRE 6653 KENWOOD 8533

141 S. E. 65TH AVENUE

PORTLAND 16, OREGON

FALL 1950

SPRING 1951

TERMS AND INFORMATION

THE SHERWOOD NURSERY COMPANY located in Portland, Oregon, are leading propagators and growers of conifers and broad leaved evergreens.

SHIPPING SEASON: Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about April 1.

TERMS:

Our terms are **NET CASH**. Note carefully the following conditions:

1. We **PAY SHIPPING COSTS** on lining out stock to all points in the United States, Canada and Alaska. Lining out stock for this purpose is defined as any stock not listed as B&B, specimen, or BR.
2. At least **ONE-FOURTH** of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full in advance required on all B&B and BR shipments.
3. The prices quoted are **NET CASH PRICES** but five percent discount will be deducted from the list price of all lining out stock when delivery is made at our Portland nursery. Prices on our B&B stock are F.O.B. our Portland Nursery, at Southeast 73rd Avenue and East Burnside Street.
POSITIVELY NO ORDER for lining out stock will be accepted for less than 25 plants of the same size and variety.
Prices quoted in the 10, 100, or 1000 lots apply to **ONE SIZE** and **ONE VARIETY** only.
We reserve the right to substitute grades when necessary and the difference is not too great.
Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped. BR signifies bare roots.
4. The prices quoted herein will hold only throughout the coming nursery year.
5. Reserve orders must be shipped not later than April 1. When at all possible we advise immediate delivery of stock.

PACKING:

No packing charge is made on any stock.

Many small balled grades can be shipped safely, packed BR (Bare Roots) in moss thereby cutting down shipping costs. Where this can be done we have so indicated. Our method of packing insures the arrival of plants in perfect condition at any place in the United States, Canada and Alaska.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner. **WE MAKE NO GUARANTEE**, either expressed or implied, that the plants will grow or give specific results. **ALL SHIPMENTS ARE MADE AT THE RISK OF THE PURCHASER AFTER BEING DELIVERED TO THE CARRIER IN GOOD CONDITION.** We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD NURSERY COMPANY
141 S. E. 65th Ave., Portland 16, Oregon

TO REACH PROPAGATING NURSERY AND SALES OFFICE:

Drive east on East Burnside Street to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city.

General Nurseries are located at Sandy, Oregon, and on the Section Line Road.

Sherwood Nursery Company pays all shipping costs on lining out stock to all points in the United States, Canada and Alaska. We pay all packing costs. Our terms are net cash. At least one-fourth of the purchase price must accompany all orders, balance C.O.D. Payment in full in advance required on all B&B and BR shipments.

— GENERAL LIST —

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

Abelia (Edward Goucher)

A choice upright abelia similar to grandiflora but with foliage of richer coloring especially in the fall when it takes on a lovely bronze cast. The abundant flowers, which cover this hardy evergreen all summer and fall, are deep pink shading to a soft lavender and mingle in perfection with the full fine foliage. Height 5 to 6 feet.

Abelia grandiflora (Glossy Abelia)

Foliage glossy green, flowers white with pink blush. A beautiful, hardy evergreen. Splendid for foundation and mass plantings. Blooms all summer and is an attractive shrub both in flower and foliage. After the flowers have fallen the persistent purplish sepals are still attractive.

ABIES (FIRS)

Abies balsamea (Balsam Fir)

A conifer of symmetrical, pyramidal growth. Has fairly dense foliage of aromatic properties and believed by some to possess medicinal value. Needles are short and thick. Hardy to Labrador.

6- 9 inches not transplanted.....	-----	-----	9	72
9-12 " " ".....	-----	-----	12	96

Abies grandis (Grand Fir)

A dark green symmetrical conifer with wide downward sweeping branches. Needles flat, rather long.

6- 9 inches not transplanted.....	9
9-12 " " ".....	12
12-15 " " ".....	15

Abies lasiocarpa (Alpine Fir)

This sturdy tree bears much the same relation to firs that the Mountain Hemlock does to hemlocks. It is the slender picturesque conifer of the higher elevations being truly a mountain subject. It thrives at the lower levels where it almost seems to bring the mountain atmosphere with it and to the tree lover there is at once an association of mountain meadows or rocks and snow fed streams where it prefers to grow. The dark silvery tinged foliage resembles the Noble Fir though having shorter needles and has the healthful fragrance of other firs.

Castanopsis sempervirens (Bush Chinquapin)

One of Oregon's wonderful native evergreens seldom offered to the trade. Unlike the tall growing form, Bush Chinaquapin usually grows only 5 to 6 feet high in a spreading, much branched shrub. A plant 4 feet high will usually spread 4 to 6 feet. A stout medium sized evergreen of surpassing merit. It grows in its native state at 2000 to 4000 feet elevation but is at home at sea level. In our mountains it sometimes covers dry open slopes where only the hardiest plants can survive the summer's heat and winter's cold. Is also found in open woods with partial shade. Foliage very dense. Leaves dark green above, russet beneath. Flowers in white clusters followed by chestnut like fruits. Bush Chinquapin is a fine foundation shrub, also good for hedges and borders. It is unexcelled for large banks and terraces. A fine addition to the trade.

Cedar—See Cedrus, Libocedrus**Cedrus deodara** (Deodar Cedar)

The Deodar Cedar grows into a fountain of green of surpassing beauty. The color is a light bluish green. With a little pruning and shearing the foliage becomes very dense and graceful. It is a native of the Himalaya mountains in India where it has been fittingly termed "Tree of the Gods."

3- 6 inches once transplanted.....	9	72
------------------------------------	-------	-------	---	----

CHAMAECYPARIS**Chamaecyparis lawsoniana** (Lawson Cypress)

A conifer of most satisfying effect, both in stately habit of growth, dense limbs and graceful foliage. Not hardy in areas of extreme cold, but fortunate, indeed, are localities which can grow this handsome tree. It is fine when grown in somewhat open or well spaced rows, and is equally good when grown as single specimens, needing no supporting plantings to enhance its beauty. Native of the Oregon coast.

3- 4 feet three times transplanted.....B&B	2.00	18.00	162

Chamaecyparis lawsoniana cerula

One of the fine Lawson variations, of which there are several. Slender and upright, the branches all growing vertical and very close to the trunk of the tree. As slender as a Pyramidal Arborvitae or Irish Juniper and needs little pruning. As indicated by the name, the foliage is of a deep sky blue or azure in color. The columnar form of the alumni cypress and very desirable where slender trees are needed.

15-18 inches twice transplanted.....B&B	.90	8.10	73
18-24 " " " " " ".....B&B	1.10	9.90	89

Chamaecyparis lawsoniana ellwoodi (Ellwood Cypress)

A semi dwarf and comparatively new addition to the cypress family which has added such a long list to the trees that we admire and love. Ellwood Cypress is a trim, compact, narrow pyramid with soft, feathery, bluish green foliage. It is superior to many of the older forms of cypress with which we are familiar and certainly will replace some of them. Naturally grows in its lovely form with scarcely any pruning. Hardy.

15-18 " " " ".....B&B	.90	8.10	73

Chamaecyparis lawsoniana erecta viridis (Green Column Cypress)

A pyramid of living green which will add life and freshness to any planting. A striking conifer with dense vertical foliage.

6- 9 inches twice transplanted.....	15	120
9-12 " " " ".....	18	144
15-18 inches twice transplanted.....B&B	.90	8.10	73

Chamaecyparis lawsoniana fletcheri (Fletcher Cypress)

A narrow pyramid in form, very neat and tidy. Compact in growth with full soft appearing foliage of blue-green color effect. On account of its erect, close habit of growth it is especially well adapted to small homes and grounds where space must be conserved. It is a tree that is pleasing in every detail.

15-18 inches twice transplanted.....B&B	.90	8.10	73
18-24 " " " ".....B&B	1.10	9.90	89

Chamaecyparis lawsoniana nestoides (Bird's Nest Cypress)

A beautiful, low growing dwarf of very regular but spreading habit of growth attaining a spread of 6 feet with a height of 2 feet. The name is misleading as it more nearly resembles a mushroom in form of growth. Has lovely bright green foliage. Excels for specimen planting.

3- 6 inches once transplanted.....	12	96
6- 9 " " " ".....	15	120

Chamaecyparis lawsoniana wisseli (Wissel Cypress)

Has a dark bluish green foliage, growing in twisted tufts or whorls and of upright growth. One of the many beautiful forms of the Lawson Cypress.

9-10 " " " ".....B&B	10.00	90.00
10-11 " " " ".....B&B	11.00	100.00

Chamaecyparis nootkatensis (Alaska Cypress)

Native on the Pacific coast from Alaska to Oregon. Rather rare in the trade. Is found from sea level to 3000 feet or above. Rapid growing and very hardy. A most lovely conifer with gracefully arching branches and pendulous tips. In fact the whole tree presents a weeping appearance of remarkable beauty.

12-15 inches twice transplanted.....B&B	.75	6.80	61
15-18 " " " ".....B&B	.90	8.10	73
18-24 " " " ".....B&B	1.10	9.90	89

Cotoneaster horizontalis (Rock Cotoneaster)

Well known and deservedly a great favorite, low growing. The side branches grow with a pleasing perfection of regularity, the leaves are small and the foliage is a good, dark green. Bears masses of red berries in the fall that are carried well into the winter. Hardy. Deciduous.

	Each	10	100	1000
3- 6 inches once transplanted.....	\$-----	\$-----	\$ 9	\$ 72

Cotoneaster parneyi (Parney Cotoneaster)

This is probably the best of the upright cotoneasters. It is evergreen, with large leaves of heavy, dark green effect. Grows to about the size of francheti, 6 to 8 feet, bears berries of brilliant red luster and in almost unbelievable profusion, being in large clusters all along the stems. A shrub which everybody likes, and one which will be used more extensively.

Cypress—See Chamaecyparis

Cytisus scoparius (Mixed Hybrid's)

These have been grown from seed of fancy hybrid brooms in about 20 varieties such as Burkwood, Lord Lambourne, Borsch's, St. Marys, Stanford, Pomona, and many others. They come in a wide range of colors and color combinations such as red, copper, white, yellow, pink, etc. Habit of growth also varies greatly. Certainly an unusual offer.

Daboecia polifolia alba (White Irish Bell Heather)

Similar to the rosea, but having nodding flowers of purest white, resembling Lily of the Valley in form and size. Has bright green foliage. Height 18 inches, spread 2 feet. Beautiful hardy evergreen. Rare.

3- 6 inches once transplanted.....	8	64
6- 9 " " " "	12	96
9-12 " " " "	15	120

Daboecia polifolia rosea (Pink Irish Bell Heather)

A splendid dwarf evergreen growing 2 feet high. Foliage fine, dark green above, silvery beneath. The flowers are abundant, rosy lavender, and resemble little bells nodding from the tips of slender, erect stems. It is one of the few dwarf shrubs which starts blooming in spring and continues in bloom until cold weather. Very desirable for borders, rockeries and masses. Hardy and new.

3- 6 inches once transplanted.....	8	64
6- 9 " " " "	12	96
9-12 " " " "	15	120

Daphne cneorum (Rose Daphne)

Probably the most delightfully fragrant of all flowering evergreens. Blooms in the spring and again in the fall. The flowers which are pink, appear in great profusion. The plant is dwarf and well adapted to rockery, border and other plantings. A hardy little dwarf of superior merit.

12-15 inches twice transplanted.....	B&B	1.10	9.90	89
15-18 " " " "	B&B	1.35	12.20	109
18-24 " " " "	B&B	1.65	14.90	134

Daphne mezereum (February Daphne)

An erect shrub with stout branches and growing to a height of 4 feet. The lilac purple flowers, like several other daphnes, are delightfully fragrant. They appear very early in the season long before the leaves and cover the bare straight stems followed in late summer and fall by masses of brilliant showy red berries. Hardy.

12-15 inches twice transplanted.....	B&B	.90	8.10	73
15-18 " " " "	B&B	1.10	9.90	89

A broad leaved evergreen, with every appearance of ivy in bush form, but often having the ivy-like leaves twisted and contorted in an interesting manner. Does well in sun or shade. Reaches a height of 2½ feet and spread of 4 feet. Very hardy and desirable.

Hedera helix conglomerata (Bunchleaf English Ivy)

Low growing. Leaves crowded, contorted and small, giving a pleasing massed effect, as the plant lies flat upon the ground. Foliage deep dense green. An interesting plant, which attracts much attention and one which makes a dense, compact ground cover. Very hardy. Also excellent for florist work.

Ivy—See Hedera

Juniperus chinensis japonica (Japanese Juniper)

Hardy, creeping juniper, foliage sharp, gray green in color. Very desirable for rockeries, terraces, walks and the like. Clings close to the ground but heaps up in large specimens to 12 or 18 inches. Very hardy.

Juniperus chinensis pfitzeriana (Pfitzer Juniper)

This well known juniper can scarcely be excelled for terrace and mass planting. Upright training gives it a very individual habit of growth and greater range of landscape uses. It is hardy and a rapid, vigorous grower and thrives under adverse conditions of soil and climate. It has fine green foliage which with a little pruning forms a dense mass. Broadly spreading, reaching in older trees a diameter of 20 to 25 feet or more. Probably the most universal favorite of all junipers of its type.

Juniperus chinensis procumbens (Chinese Creeping Juniper)

A very hardy prostrate form with rigid horizontal branches. Foliage rather coarse and prickly, bright green all seasons of the year. Juvenile and adult foliage is intermingled in heavy mats along the stems.

Jun. chin. pro albo-variegata (White Variegated Creeping Juniper)

A variegated form of the above with white splashes and tips intermingled with the green.

3- 6 inches once transplanted.....	15	120
6- 9 " " ""	18	144

Juniperus chinensis sargentii (Sargent Juniper)

This juniper has been well proven as it has been grown in American gardens for more than fifty years. It was first introduced into the Arnold Arboretum from Japan by Prof. Sargent in 1892. The branches overlap each other forming neat, dense masses of bluish green. It is a wide, low growing, spreading juniper reaching a height of only one foot and a spread of 10 to 12 feet or more in older trees. It is ideal for banks and terraces and for borders for taller growing trees. Its dense matted foliage and spreading habit of growth make it a ground cover of unsurpassed merit. The plants here listed are the bluish green type and the foliage possesses characteristics of peculiar and unusual beauty. Does well in poor or sandy soil. Very hardy.

6- 9 " " ".....	15	120
9-12 " " ".....	18	144

Juniperus conferta (Shore Juniper)

A low creeping juniper with dense, bright green foliage. Makes a heavy matted ground cover 6 inches high. A decidedly pleasing effect. This remarkably fine trailing evergreen makes one of the most beautiful of ground covers. Good in rockeries or terraces. Superb when hanging over walls. Holds its vivid green color the year around. Very hardy.

3- 6 inches once transplanted.....	12	96
6- 9 " " ".....	15	120
9-12 " " ".....	18	144

Juniperus horizontalis (Bar Harbor Blue Creeping Juniper)

Procumbent with trailing, spreading branches well filled with foliage, forming a compact mat in mature plants. Foliage is charming steel blue the year round, almost cypress like in texture somewhat resembling the Waukegan Juniper. Native Nova Scotia to British Columbia and south to New York. Very hardy. Valuable as a ground cover in exposed situations and in sandy and rocky soil, combining as it does delightful qualities of color, foliage, habit of growth and hardiness. Height 6 inches.

Juniperus horizontalis glauca (Blue Creeping Juniper)

Very similar to the Bar Harbor Blue with steel blue foliage throughout the year and more cypress like in texture. A very lovely trailing form. Very hardy.

3- 6 inches once transplanted.....	12	96
6- 9 " " ".....	15	120
9-12 " " ".....	18	144
12-15 " " ".....	21	168

A shapely pyramid in form, with fine, fan-like foliage, that is dense, and a beautiful glossy-green. The foliage is also delightfully fragrant. The bark is bright cinnamon-red. Incense Cedar is native Oregon to California and western Nevada. Flourishes on the cold eastern slopes of the Cascade mountains and in dry, rocky soil. A tall growing tree. As an ornamental, they are grown chiefly for their handsome, fragrant evergreen foliage and charming habit of growth. The perfect symmetry of growth from the ground to tip of the tree is a characteristic that places *decurrrens* almost in a class by itself, the only other conifer that is comparable being *Sequoia gigantea*.

An upright, rapid growing, semi evergreen. Stands shearing well. Thick, luxuriant, bright green foliage. Leaves small, branches slender. Shrub to 8 feet. A fine hedge subject. Native of China and Korea. Hardy.

12-24 inches once transplanted BR hedge grade.....	18	144
2- 3 feet once transplanted BR hedge grade.....	25	200

An ornate little evergreen shrub, native of Oregon, where it is much loved and enjoyed. Leaves are holly like and bright green. Has long clusters of bright golden yellow flowers in the spring, followed by bunches of bright blue, grape-like berries, which are sometimes used for jelly making. Attractive foliage, flower and fruit. Also fine for interior decorative purposes. Some leaves take on autumn tints of crimson, deep red, bronze and gold. The shrub is at its best in group plantings. One of the hardiest of the broad-leaved evergreens.

3- 6 inches once transplanted.....	9	72
------------------------------------	---	----

Plants grow 12 to 18 inches tall. The leaves which are 12 to 15 inches long are beautifully fern like in form. Flowers are bright golden yellow, followed by bunches of bright blue, grape like fruit. The foliage is dark green turning to most beautiful shades of brilliant red and bronze in the fall. Does well in sun or shade. Thrives under conifers. Very hardy. One of the very best of Oregon's native shrubs.

3- 6 inches once transplanted:	9	72
--------------------------------	---	----

A native of the Orient. Characterized by delicate foliage, the long slender leaves being frond-like. It bears large clusters of bright red berries which at times almost cover the top of the plant. Some of the leaves turn in autumn to attractive shades of red, bronze and scarlet, and some remain green. Height 4 to 5 feet. Good for specimen or mass plantings. One of the finest hardy evergreens grown.

Pieris japonica (Oriental Pieris)

A shrub of oriental origin, growing to a height of 4 or 5 feet. Has glossy deep green foliage. In early spring it is crowned in a magnificent way with large clusters and masses of white drooping bell-shaped flowers which sometimes appear before the last late flurries of snow have gone. The young foliage is tinged with pink. One of the very best evergreen ornaments for landscaping purposes. Hardy.

PINUS (PINES)

Pinus aristata (Bristlecone Pine)

Slow growing and rather dwarf. A handsome low shrub with a picturesque and irregular habit of growth. Branches thickly clothed with heavy dark green foliage. Hardy into New England. A native of the western mountains.

6- 9 " " " ".....				9	72

Pinus mughus compacta (Mugho Pine)

A dense, stout dwarf evergreen, of unquestionable hardiness. Coming from the high mountains of central Europe it has been dwarfed as trees frequently are that are storm swept for centuries along bleak coastlines or in rugged mountains, and only the hardiest and fittest survive. Such is the selected Mugho Pine, without a peer as a dwarf mountain evergreen. Mature trees reach a height of 4 to 5 feet but having a spread of 6 to 8 feet. It grows with numerous branches and can be kept sheared to small size if desired. Very dense, compact and deep green summer and winter. Our trees are grown from selected seed of the best type and are of very uniform quality.

Pinus tabulaeformis (Chinese Pine)

A medium sized conifer, native of western China. Dense foliage, which clothes even the stem and branches. Needles 2 to 4 inches long, charmingly brilliant green, soft to the touch and soft, silky luster. The foliage is a distinctive and decidedly pleasing shade of green, and is in this respect unquestionably the finest of any conifer that we are growing. Its general effect is just right. It could hardly be surpassed for large banks, and hillside plantings. Hardy into New England in sheltered locations. Rare. Splendid hedge subject.

Privet—See Ligustrum

Redcedar—See Juniperus

Rhododendron macrophyllum (Coast Rhododendron)

A hardy rhododendron, native of the Coast and Cascade mountains of Oregon, Washington and British Columbia. It has full fine foliage. Flower trusses are showy red in the bud opening in a range of shades from delicate to deep pink. It grows either in open or shaded places and it is often at its best when banked in against a rocky hillside or against verdant firs or hemlocks. Residents of the area look forward to the rhododendron season and are well repaid for driving considerable distance to see them in their natural setting when in bloom. It is classed as one of the best of broad leaved evergreens.

4- 6 " " "	-----	-----	18	144

Rhododendron maximum (Rosebay Rhododendron)

Large, rapid growing shrub. Leaves often 12 inches long, dark green, lustrous above. Flowers usually rose colored in large clusters. A bold, magnificent evergreen. Fine for naturalistic and woodland plantings. Rhododendrons are always described in superlatives. Among its many fine features is that it is hardy as far north as Quebec. Flowers in June and July. Native from Ontario to Georgia.

Taxus cuspidata (Japanese Yew)

This beautiful yew is a native of the Orient and is hardy, strong and dwarf. It is a spreading tree and in older specimens may reach a spread of 20 feet and height of 8 feet. Cuspidata is fine for hedges and can be held to a superb dwarf hedge only 12 to 15 inches tall as it can stand any amount of pruning. It is equally good for medium hedges and is perfectly adapted to small homes. Has deep green foliage. Its long and continued use speaks much for the quality and desirability of the Japanese Yew. One of the most satisfactory of all dwarf evergreens for specimen and foundation use.

Thuja occidentalis (American Arborvitae)

Native New Brunswick and Manitoba to North Carolina and Illinois. An old, standard favorite. Grows in compact form, narrow pyramid in shape and attaining a height of 60 feet. Withstands low degrees of temperature, makes fine low hedges or taller wind breaks. A tree that has always been justly esteemed.

Thuja occidentalis pyramidalis (American Pyramidal Arborvitae)

A most desirable arborvitae of narrow columnar growth, dense and compact without pruning. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges requiring but little space are desired Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from 4 to 20 feet in height as desired and occupies only 2 feet in width. For hedges trees should be planted 18 inches apart. A Pyramidal Arborvitae hedge requires scarcely any care.

TSUGA (HEMLOCKS)**Tsuga canadensis** (Canada Hemlock)

Native New Brunswick, to Wisconsin and south to Alabama. A well known conifer of graceful, pleasing habit of growth, and regarded by some landscape architects as one of the best of conifers. Perfectly hardy, withstanding low temperature without injury to tree or foliage. Foliage is heavy and attractive, needles are short. Is naturally broadly pyramidal in form but can be grown to a rounded head, and lends itself well to pruning into hedges.

Xerophyllum tenax (Pine Lily, Bear Grass, Squaw Grass, or Indian Basket Grass)

A native of the Cascade and Rocky mountains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about 18 inches high and 2 to 3 feet across. Out of the center of this grassy bunch grow the tall stems 3 to 5 feet in height and from 1 to as many as 20 in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
